A
Mean field: vigilance falls as rotation rises
mean PC (vigilance)
mean honesty y
Time average
Rotation rate ρ
B
Mean field: episode depth (cycles only, ρ < ρc)
peak corruption in episode, 1 − min y
min cooperation in episode
Episode depth measure
Rotation rate ρ
C
Mean field: episodes become rarer
Cycle period (model time)
Rotation rate ρ
D
IBM small population
mean PC (vigilance)
mean honesty y
Time average
ρ per generation (ρ = 0 at 10⁻³)
E
IBM: depth of the remaining episodes
min cooperation in episode
peak corruption in episode
Episode depth measure
ρ per generation
F
IBM: frequency and duration of episodes
episodes per 1000 generations
mean episode duration (generations)
ρ per generation
