A
B
C
Information cost h
Rotation rate ρ
time-averaged honesty
cycle amplitude of y
ρc(h) (continuation)
small-mu formula
h = √f(f + B) (Eq. 4 bound)
IBM, small population (mean, 95% CI)
h = 0.05
h = 0.1
h = 0.15
h = 0.2
h = 0.25
ρ per generation (ρ = 0 at 10−3)
